This e-learning course is suitable for any member of staff involved with clients in the Recruitment industry. In particular Credit Controllers, Account Managers, Risk Managers and Auditors.

WHAT WILL STUDENTS LEARN?

The Recruitment industry has grown significantly since the early 1990's and due to its nature remains one of the largest markets for the invoice finance industry. Turnover within the industry is predicted to be around £25 billion, an increase of nearly four fold since 1994. The invoice finance industry provides finance for businesses specialising in the provision of temporary and permanent staff to all kinds of industries.

- How do recruitment companies attract the right staff?
- What laws may affect recruitment companies, either directly or indirectly?
- What challenges do recruitment companies face in the near future?

These are the sorts of areas that we will be looking at in this e-learning module, together with specific invoice financing risks associated with this type of debt.

The sections cover the following areas:

Trading Risk - Looks at the challenges the industry is facing in terms of technology, outsourcing and the changes in the profile of the workforce.

Financing Risk - Examines the specific risks an invoice financier is faced with when managing clients from the recruitment industry, including scenarios and examples of how these risks can be managed.
